Monash Consulting Services is the gateway into Monash University for companies to access expertise and specialist infrastructure.

Our objective is to make this interaction straightforward for companies by providing a professional service that manages all steps of the consulting process.

Make a difference to your organisation

Monash Consulting Services connects organisations that are seeking to resolve specific problems or to gain competitive advantage in their markets with experts at Monash University. By accessing independent expertise, organisations are able to identify and implement innovative, new approaches to doing business.

Services offered

By identifying relevant capabilities to meet client requirements, Monash Consulting Services provides clients with a solution to their needs. Services offered include:

- Technical expertise and advice;
- Specialist testing facilities;
- Bespoke management development and training;
- Expert Witnesses; and
- Academics suitable for Advisory Boards.

Australia ■ China ■ India ■ Italy ■ Malaysia ■ South Africa

The consultative process

The first point for a company to engage a consultant is to contact Monash Consulting Services to discuss their requirements. Following this conversation, Monash Consulting Services will take care of all steps of the initial engagement, identification of the appropriate Monash expert, manage client-academic communications, proposal submission, contract development and management of project deliverables.

Client contacts Monash Consulting Services (MCS)

MCS identifies appropriate expertise

MCS facilitates project scoping meeting with client and academic

Consulting Agreement developed and signed

Project initiated

MCS manages delivery of project milestones
